CONTENTS

VOLUME 4 (1967)

The origin of complete and mosaic mutants from mutagenic treatment of single cells
by ANWAR NASIM AND C. AUERBACH (Edinburgh, Great Britain) 1–14

A characteristic of the lethal effect of ionizing radiation on "Hcr⁻" bacterial strains
by TIKVAH ALPER (London, Great Britain) 15–20

Quantitative and qualitative aspects of photoreactivation of premutational ultraviolet damage at the *ad-3* loci of *Neurospora crassa*
by B. J. KILBEY AND F. J. DE SERRES (Oak Ridge, Tenn.) 21–29

Forward mutation studies with *N*-nitroso-*N*-methylurethane and *N*-nitroso-*N*-ethylurethane in *Schizosaccharomyces pombe*
by A. ABBONDANDOLO AND N. LOPRIENO (Pisa, Italy) 31–36

Comparison of mutagenesis by X-rays and triethylene melamine in *Paramecium*, with emphasis on the role of mitosis
by R. F. KIMBALL AND STELLA W. PERDUE (Oak Ridge, Tenn.) 37–50

Induction of chromosome- and chromatid-type aberrations by phleomycin
by ELLEN MATTINGLY (Oak Ridge, Tenn.) 51–57

Viability of heterozygotes for induced mutations in *Drosophila melanogaster*
III. Mutations in spermatogonia
by RAPHAEL FALK (Jerusalem, Israel) 59–72

Induction of paternal sex-chromosome losses and deletions and of autosomal gene mutations by the treatment of mouse post-meiotic germ cells with triethylenemelamine
by B. M. CATTANACH (Oak Ridge, Tenn.) 73–82

Induction of chromosome aberrations in cultured human cells by ethylenimine and its relation to cell cycle
by TSUENG-HSING CHANG AND FLORA T. ELEQUIN (Philadelphia, Penna.) 83–89

The induction of mosaic and complete *dumpy* mutants in *Drosophila melanogaster* with ethyl methanesulfonate
by JOHN B. JENKINS (Los Angeles, Calif.) 90–92

Differential effects of acriflavine and caffeine on various ultraviolet-irradiated *Escherichia coli* strains and T1 phage
by WALTER HARM (Dallas, Texas) 93–110

Effect of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine on the F factor of *Escherichia coli*
by I. TAKAHASHI AND R. A. BARNARD (Hamilton, Ont., Canada) 111–117

Transferable resistance factors with mutator effect in *Salmonella typhi*
by D. SOMPOLINSKY, M. BEN-YAKOV, M. ABOUD AND I. BOLDUR (Ramat-Gan and Zrifin, Israel) 119–127

Two types of radiation-sensitive mutant in yeast
by SAYAKA NAKAI AND SHINJI MATSUMOTO (Chiba, Japan) 129–136

The mechanism of recombination in *Chlamydomonas reinhardi*
I. The influence of inhibitors of protein synthesis on intergenic recombination
by C. W. LAWRENCE AND D. R. DAVIES (Wantage, Berks., Great Britain) 137–146

The mechanism of recombination in *Chlamydomonas reinhardi*
II. The influence of inhibitors of DNA synthesis on intergenic recombination
by D. R. DAVIES AND C. W. LAWRENCE (Wantage, Berks., Great Britain) 147–154

Chromosome breakage induced in *Vicia faba* by a monofunctional alkylating derivative of acridine
by S. KUMAR, U. AGGARWAL AND M. S. SWAMINATHAN (New Delhi, India) 155–162

Induction of high-yielding mutants in jute
by RABINDRA KRISHNA BASU (Calcutta, India) 163–167

Post-radiation recovery in early spermatids sampled from *Drosophila* pupae
by WILLIAM A. F. WATSON (Leiden, The Netherlands) 169–176

Sur les différents types de mutations extranucléaires induites par le méthane sulfonate d'éthyle chez *Nicotiana tabacum* L.
par H. DULIEU (Dijon, France) 177–189

The oxygen effect and its relation to changes in radiosensitivity during seed germination
by RICHARD L. LATTERELL AND DALE M. STEFFENSEN (Washington, D.C. and Urbana, Ill.) 191–200

Translocational *Pale* Drosophilae and *Snaker* mice, a semicentennial parallel
by H. J. MULLER (Bloomington, Ind.) 201–205

The mutagenic activity of 1-alkyl-1-nitrosoureas and 1-alkyl-3-nitro-1-nitrosoguanidines
by TOMÁŠ GICHNER AND JIŘÍ VELEMÍNSKÝ (Prague, Czechoslovakia) 207–212

Lack of mutagenic influence of temperature shock on presyngamic sperm nuclei
by PHILIP E. HILDRETH (Berkeley, Cal.) 213–218

Gene-controlled UV-sensitivity in *Schizosaccharomyces pombe*
by K. HAEFNER AND L. HOWREY (Dallas, Texas) 219–221

Dose-rate effect in the repair of radiation damage in spermatids of *Drosophila melanogaster*
by K. SANKARANARAYANAN (Leiden, The Netherlands) 222–224

Sperm storage: modification of recovered dominant lethal mutations induced by tretamine and analogs
by DAVID T. NORTH (Fargo, N. Dak.) 225–228

The reversed dose-rate effect with fast neutron irradiation of mouse spermatogonia
by A. L. BATCHELOR, RITA J. S. PHILLIPS AND A. G. SEARLE (Harwell, Didcot, Berks., Great Britain) 229–231

Dominant lethals in young female mice
by GUNTER RÖHRBORN AND HELGA BERRANG (Heidelberg, Germany) 231–233

The rate of dominant lethals after low X-ray doses given to mouse spermatozoa
by A. LÉONARD AND GH. DEKNUDT (Mol, Belgium) 234–236

Obituary Note—Milislav Demerec 1895–1966
by EVELYN M. WITKIN (Brooklyn, N.Y.) 237–239

Dégradation par la cellule hôte du DNA du bactériophage lambda irradié par le rayonnement ultraviolet
par DAISY ROULLAND-DUSSOIX (Genève, Suisse) 241–252

Two types of X-ray-sensitive mutants of *Escherichia coli* B: their phenotypic characters compared with UV-sensitive mutants
by TAKESI KATO AND SOHEI KONDO (Kita-ku, Osaka, Japan) 253–263

The mutagenicity of the acridine mustard (ICR-170) and the structurally related compounds in *Neurospora*
by H. V. MALLING (Oak Ridge, Tenn., U.S.A.) 265–274

Altered recombination frequencies in radiation-sensitive strains of *Ustilago*
by ROBIN HOLLIDAY (London, Great Britain) 275–288

Mutagenic and antimutagenic effects of acridinium salts in yeast
by P. P. PUGLISI (Parma, Italy) 289–294

Saturation of the dose–response curve for chromosome exchanges in *Tradescantia* microspores
by JOHN R. K. SAVAGE (Harwell, Didcot, Berks., Great Britain) 295–306

The pattern of chromosome aberrations after the X-irradiation of *Trillium grandiflorum* pollen
by C. J. GRANT (Oxford, Great Britain) 307–314

The influence of thymidine and deoxycytidine on the chromosome-breaking effect of triethylenemelamine in *Vicia faba*
by VITTORIA NUTI RONCHI, M. BUIATTI AND P. L. IPATA (Pisa, Italy) 315–321

Sensitivity differences in the successive stages of spermatogenesis in *Drosophila* after irradiation in nitrogen or air
by Toshio Shiomi (Karlsruhe, Germany) 323–332

Induced heterologous exchange at meiosis in *Drosophila*
I. Exchanges between Y and fourth chromosomes
by D. R. Parker (Riverside, Calif.) 333–337

On the distributions of frequencies of mutation to genes determining harmful traits in man
by A. C. Stevenson and C. B. Kerr (Oxford, Great Britain) 339–352

Die Wirkung von Thioguanin, Hydroxylamin und 5-Bromdesoxyuridin auf menschliche Chromosomen *in vitro*
von Wolfgang Engel, Winfrid Krone und Ulrich Wolf (Freiburg i.Br., Deutschland, und Dallas, Texas) 353–368

Repair of DNA damaged by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine in *Escherichia coli*
by E. Cerdá-Olmedo and P. C. Hanawalt (Stanford, Calif.) 369–371

Glucose requirement for DNA breakdown resulting from treatment of *Bacillus subtilis* with ultraviolet radiation or methyl methanesulfonate
by T. Searashi and B. Strauss (Chicago, Ill.) 372–375

Increased mutagenic effect of ethyl methanesulfonate when dissolved in dimethyl sulfoxide
by C. R. Bhatia (Upton, N.Y.) 375–376

Induction of mitotic recombination with ethyleneimine in *Saccharomyces cerevisiae*
by F. K. Zimmermann and U. von Laer (Freiburg, i.Br., Germany) 377–379

Genetical analysis of the storage effect of triethylene melamine (TEM) on chromosome breakage in *Drosophila*
by W. Ratnayake, C. Strachan and C. Auerbach (Edinburgh, Great Britain) . . 380–381

Gene-controlled change in mutational stability of a tryptophanless mutant of *E. coli* WP2
by V. L. Chopra (Edinburgh, Great Britain) 382–384

The induction of chromosomal aberrations by hydrogen peroxide in strains of ascites tumor in mice
by Jörg Schöneich (Gatersleben, Aschersleben, Germany, DDR) 385–388

Inactivation and mutagenesis on isolated DNA
I. Theory of inactivation of transforming DNA
by S. E. Bresler, V. L. Kalinin and D. A. Perumov (Leningrad, U.S.S.R.) 389–398

Radiation-induced lethal sectoring in *Escherichia coli* B/r and B_{s-1}
by K. Haefner and Ute Striebeck (Dallas, Texas) 399–407

The mutagenic effect of prolonged treatment with ethyl methanesulfonate
by J. Nečásek, P. Pikálek and J. Drobník (Prague, Czechoslovakia) 409–413

Allelic complementation among nitrous acid-induced *ad-3B* mutants of *Neurospora crassa*
by F. J. de Serres, H. E. Brockman, W. E. Barnett and H. G. Kølmark (Oak Ridge, Tenn.) 415–424

Relation between complementation patterns and genetic alterations in nitrous acid–induced *ad-3B* mutants of *Neurospora crassa*
by H. V. Malling and F. J. de Serres (Oak Ridge, Tenn.) 425–440

Analysis of the mosaicism induced by hydroxylamine and nitrous acid in *Schizosaccharomyces pombe*
by R. Guglielminetti, S. Bonatti, N. Loprieno and A. Abbondandolo (Pisa, Italy) 441–447

Real chromatid deletions *versus* gaps
by Alan D. Conger (Philadelphia, Pa., and Upton, N.Y.) 449–459

The relative mutagenic effectiveness of fast neutrons and X-rays in pre- and post-meiotic germ cells of *Drosophila melanogaster*
by M. J. Lamb, T. W. McSheehy and C. E. Purdom (Harwell, Didcot, Berksh., Great Britain) 461–468

On the relationship between the frequency of two types of mutation and soft X-ray doses in *Drosophila*
by Y. Matsudaira, T. Ito, T. Yamasaki, S. Ishizaki and M. Domon (Tokyo, Japan) 469–472

Action mutagène des UV sur les ovogonies de Drosophiles
I. Cinétiques de la mutagénèse
par JACQUELINE PROUET (Paris, France) 473–489

Action mutagène des UV sur les ovogonies de Drosophiles
II. Effets du double éclairement et du fractionnement sur le pourcentage de mutations
par JACQUELINE PROUST ET ANNE FLAMAND (Paris, France) 491–501

Mutation in *Escherichia coli* B/r WP2 try⁻ by reversion or suppression of a chain-terminating codon
by B. A. BRIDGES, RACHEL E. DENNIS AND R. J. MUNSON (Harwell, Didcot, Berksh., Great Britain) 502–504

Characterization of revertants of *E. coli* WU36–10 and WP2 using amber mutants and an ochre mutant of Bacteriophage T4
by MARY OSBORN AND STANLEY PERSON (University Park, Penna.) 504–507

Differential effect of incubation temperature on nitrous acid-induced reversion frequencies at two loci in *Neurospora*
by C. AUERBACH AND D. RAMSAY (Edinburgh, Great Britain) 508–510

X-Chromosome loss induced by low X-ray doses in mature and immature oocytes of *Drosophila melanogaster*
by H. TRAUT (Münster, Westf., Germany) 510–513

A remark to the origin of complete mutants observed after UV treatment of *Schizosaccharomyces pombe*
by K. HAEFNER (Dallas, Texas) 514–516

Inactivating DNA alterations induced by peroxides and peroxide-producing agents
by E. B. FREESE, J. GERSON, H. TABER, H.-J. RHAESE AND E. FREESE (Bethesda, Md.) 517–531

DNA synthesis after ultraviolet light irradiation in UV-sensitive mutants of *Bacillus subtilis*
by S. OKUBO AND H. NAKAYAMA (Fukuoka, Japan) 533–541

The effect of carbamates on *Bacillus subtilis*
by R. DE GIOVANNI-DONNELLY, S. M. KOLBYE AND J. A. DIPAOLO (Bethesda, Md.) . 543–551

The association of caffeine resistance and ultraviolet sensitivity in *Escherichia coli:* A simple method of selecting radiation-sensitive and radiation-resistant mutants
by G. W. GRIGG (Epping, N.S.W., Austria) 553–557

Mutagenicity of methylhydroxylamines in *Neurospora crassa*
by H. V. MALLING (Oak Ridge, Tenn.) 559–565

A system for the study of interlocus specificity for both forward and reverse mutation in at least eight gene loci in *Aspergillus nidulans*
by T. ALDERSON AND C. SCAZZOCCHIO (Cambridge, Great Britain) 567–577

X-ray-induced chromosomal aberrations in *Vicia faba:* Changes in response during the cell cycle
by D. SCOTT AND H. J. EVANS (Harwell, Berks. and Aberdeen, Great Britain) . . . 579–599

Some postirradiation factors affecting the induction of chromosome aberrations by ionizing radiation: Control of rejoining at sites
by S. KUMAR AND A. T. NATARAJAN (New Delhi, India) 601–604

The effect of γ-irradiation on a polygenically inherited character in *Nicotiana tabacum* L. in relation to selection after treatment of aged seeds
by A. ANDO AND R. VENCOVSKY (São Paulo, Brazil) 605–614

The effect of chloramphenicol on the chromosome-breaking action of 8-ethoxycaffeine and 6-methylcoumarin in *Vicia faba*
by V. N. RONCHI AND M. BUIATTI (Pisa, Italy) 615–619

Activity of L-threitol-1,4-bismethanesulfonate on barley chromosomes in relation to chemical transformation during treatment
by R. MATAGNE (Liège, Belgium) 621–630

Induced crossing-over in the males of *Drosophila ananassae:* Exchanges mainly in spermatocytes of adults
by P. G. KALE (Varanasi, India) 631–639

CONTENTS

The effects of nitrogen and oxygen treatments on the frequencies of X-ray-induced dominant lethals and on the physiology of the sperm in *Drosophila melanogaster*
by K. Sankaranarayanan (Leiden, The Netherlands) 641–661

Major congenital malformations from irradiations of sperm and eggs
by H. B. Newcombe and J. F. McGregor (Chalk River, Ont., Canada) 663–673

The radiosensitivity of offspring of an irradiated mouse population
I. Effects on the reproductive capacity of irradiated female offspring
by W. Sheridan (Stockholm, Sweden) 675–681

The radiosensitivity of offspring of an irradiated mouse population
II. The effects of acute or fractionated doses of X-rays on male offspring
by W. Sheridan and C. Rönnbäck (Stockholm and Sundbyberg, Sweden) 683–688

Chromosome rearrangements induced in the mouse by embryonic X-irradiation
I. Pronuclear stage
by A. Leonard and Gh. Deknudt (Mol, Belgium) 689–697

A set of amber mutants of bacteriophages λ and MS2 suitable for the identification of suppressors
by M. Van Montagu, C. Leurs, P. Brachet and R. Thomas (Gent and Brussels, Belgium) 698–700

Induction of mutations to streptomycin and spectinomycin resistance in *Escherichia coli* by *N*-methyl-*N'*-nitroso-*N*-nitroguanidine and acridine half-mustard ICR-191
by L. Silengo, D. Schlessinger, G. Mangiarotti and D. Apirion (St. Louis, Mo.) . 701–703

The chromosome breaking effect of the irradiated endosperm in water-soaked seeds of *durum* wheat
by S. Avanzi, G. Corsi, F. D'Amato, C. Floris and P. Meletti (Pisa, Italy) 704–707

The effect of caffeine on chromosome loss and nondisjunction in *Drosophila*
by S. Mittler, J. E. Mittler, A. M. Tonetti and M. E. Szymczak (DeKalb, Ill.) . . 708–710

A failure to detect any mutagenic action of urethane in the mouse
by A. J. Bateman (Manchester, Great Britain) 710–712

Induction indirecte du prophage λ par le rayonnement ultraviolet
par R. Devoret et J. George (Gif-sur-Yvette, France) 713–734

Isolation and characterization of new sus (amber) mutants of bacteriophage λ
by R. Thomas, C. Leurs, C. Dambly, D. Parmentier, L. Lambert, P. Brachet, N. Lefebvre, S. Mousset, J. Porcheret, J. Szpirer and D. Wauters (Brussels, Belgium) 735–741

The dual genetic control of ornithine transcarbamylase synthesis in *Escherichia coli* K12
by N. Glansdorff, G. Sand and C. Verhoef (Brussels, Belgium, and Utrecht, The Netherlands) 743–751

The induction of replicating instabilities by mutagens in *Schizosaccharomyces pombe*
by Anwar Nasim (Edinburgh, Great Britain) 753–763

UV-sensitive mutants of *Chlamydomonas reinhardi*
by D. Roy Davies (Wantage, Berks., Great Britain) 765–770

Interphase sensitivity to the chromosome-breaking effect of 2'-deoxyadenosine: An autoradiographic study
by B. A. Kihlman and B. Hartley (Uppsala, Sweden) 771–782

Studies on the effects of phleomycin on chromosome structure and nucleic acid synthesis in *Vicia faba*
by B. A. Kihlman, G. Odmark and B. Hartley (Uppsala, Sweden) 783–790

The chromosome breaking effect of 6-methylcoumarin in *Allium cepa* in relation to the mitotic cycle
by V. Nuti Ronchi and P. G. Arcara (Pisa, Italy) 791–796

Die unterschiedliche Empfindlichkeit der Genome von *Oenothera berteriana* gegenüber Äthylmethansulfonat
von M. Kressel und C. G. Arnold (Erlangen, Deutschland) 797–804

Fitness of heterozygotes for irradiated chromosomes in *Drosophila*
by Raphael Falk (Jerusalem, Israel) 805–819

Viability coefficients and preferential recovery
by RAPHAEL FALK (Jerusalem, Israel) 821–830

Effect of sigma virus on developmental delay in *Drosophila melanogaster* caused by X-ray induced mutants in heterozygous condition
by ROBERT C. BAUMILLER (Woodstock and Baltimore, Md.) 831–836

Action des UV sur la recombinaison génétique dans les ovogonies de Drosophiles
par JACQUELINE PROUST (Orsay, France) 837–863

Birth weight in pigs descended from irradiated spermatogonia
by D. F. COX (Ames, Iowa) 865–869

Evidence for two geometrically distinct targets mediating arginine reversion in *E. coli*
by R. C. BOCKRATH (University Park, Pa.) 871–873

Influence of chloramphenicol on the reunion frequency of cytoxan induced chromosome breaks in HeLa cells
by F. VOGEL AND M. VRBA (Heidelberg, Germany, and Brno, Czechoslovakia) . . . 874–875

Lethal sectoring and the origin of complete mutants in *Schizosaccharomyces pombe*
by C. AUERBACH (Edinburgh, Great Britain) 875–878

Author Index, Vol. 4 (1967) 879–880

Subject Index, Vol. 4 (1967) 881–886
